Murzi, Tartary, Tabuny (Kereytov) (150)

Artillery-

20-30 pieces

Grand Total: 18,087

Swedish sources state that the Russian Army numbered approximately 50,000 men of which the core of the army was "made up of 10,000 good and well-trained infantry". The difference might be the large numbers of non-combatants who traditionally were a part of the Russian Army. There is also the tendency to exaggerate the strength of one's opponent in order to minimize a defeat or add more glory to a victory.
